

RAJNEESH KUMAR

Software Engineer — Full-Stack Developer

☎ +91-6388860757 | ✉ kumarajneesh008@gmail.com | 🔗 LinkedIn | 🐙 GitHub | 🌐 Portfolio

Summary

Software Engineer with hands-on experience designing and developing scalable web applications, backend services, and AI-powered software solutions using React.js, Next.js, Node.js, Express.js, MongoDB, and PostgreSQL. Strong foundation in software engineering principles, object-oriented programming, data structures and algorithms, RESTful API design, database design, debugging, and performance optimization. Experienced in building secure, maintainable, and production-ready applications while collaborating in Agile development environments and following modern software engineering best practices.

Technical Skills

Languages: JavaScript, Python, Java

Frontend: React.js, Next.js, Redux, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, RBAC, Socket.io, Redis

Databases: MongoDB, PostgreSQL (Neon), MySQL, Database Design, Schema Modeling

Cloud & DevOps: AWS (EC2, S3, CloudWatch), Git, GitHub, CI/CD, Vercel, Render

Computer Science Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, Software Engineering

Experience

Full-Stack Developer Intern

Jun 2025 – Jul 2025

Sipher Web Private Limited

React.js, Node.js, Express.js, MongoDB

- **Delivered 8+ production-ready software features** across frontend, backend, and database layers using React.js, Node.js, Express.js, and MongoDB, **improving data integrity by 30%** through schema validation and middleware.
- **Implemented JWT-based authentication and role-based access control (RBAC)** across 10 REST API routes, reducing unauthorized access by 40% and securing all application modules.
- **Optimized feed loading and pagination performance by 35%** under concurrent usage through MongoDB indexing and React performance optimization hooks.

Artificial Intelligence Intern

Jun 2024 – Aug 2024

National Institute of Electronics and Information Technology (NIELIT), Lucknow

Python, scikit-learn, pandas

- **Trained and benchmarked supervised machine learning models** including K-Nearest Neighbors (KNN) and Decision Tree using Python and scikit-learn, achieving **90% classification accuracy** through cross-validation-driven model selection.
- **Developed end-to-end data preprocessing pipelines** using pandas and scikit-learn, handling missing values, encoding categorical features, and normalizing datasets, **improving overall data quality by 35%**.

Projects

CodePulse AI | Next.js, Node.js, Express.js, PostgreSQL (Neon), Gemini API 🐙 Code | 🌐 Live 2025 – 2026

- **Architected an AI-powered developer intelligence platform** that transforms GitHub repositories into interactive engineering reports, covering architecture analysis, code quality evaluation, and technical debt insights.
- **Designed secure RESTful APIs integrating GitHub repository data with the Gemini API**, enabling automated repository analysis, engineering scoring, and AI-driven recommendations persisted in a PostgreSQL (Neon) database.

StayNest | React.js, Node.js, Express.js, MongoDB, JWT 🌐 Live 2024

- **Engineered a full-stack property rental platform with 12+ RESTful API endpoints** covering authentication, search, listing management, and bookings, using environment-based configuration for clean development and production separation.
- **Secured write operations with JWT-based access control** across 200+ property listings and integrated a Cloudinary image upload pipeline with automatic compression for efficient media management.

Zarrin Blogs | React.js, Node.js, Express.js, MongoDB, JWT 🌐 Live 2024 – 2025

- **Designed a full-stack blogging platform end-to-end**, from MongoDB schema design to responsive UI, exposing **10+ RESTful API endpoints** for content management, categories, comments, likes, bookmarks, and trending feeds.
- **Enforced ownership-based authorization with JWT and RBAC** for Admin and User roles, enabling moderation workflows and privilege delegation across all write operations.

Education

Bachelor of Computer Applications (BCA)

2023 – 2026

SRMCEM, Lucknow

CGPA: 7.6 / 10

- *Relevant Coursework:* Data Structures, Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, Software Engineering
